About this Report

This is the first annual environmental, social, and governance (ESG) report of Ichor Holdings, Ltd., which covers the 2021 calendar year. This report covers our global operations, with the exception of IMG Companies, LLC and subsidiaries, which we acquired in late 2021.

This report provides an overview of our corporate social responsibility (CSR) programs and activities and is structured to cover ESG topics determined to be "material" through our 2021 materiality assessment. We prepared it in accordance with the Global Reporting Initiative (GRI) Standards: Core option, to the extent that information is currently available. A full GRI Content Index can be found on pages 31-37. This report has not been externally assured.

To provide feedback or ask questions, please contact us at **esg@ichorsystems.com**. Visit our website, **https://www.ichorsystems.com/**, for more information on our company, products and services, and financials, and **https://www.ichorsystems.com/esg** for our corporate social responsibility.

©2022 Ichor Systems

Letter from Our CEO

On behalf of our whole team at Ichor Systems, I'd like to welcome you to our first Environmental, Social, and Governance (ESG) report. We're proud to share with you what we've been accomplishing as a team and the ways we are working toward ever-greater results.

As a leading contributor to the value chain for wafer fab equipment (WFE) that is used to fabricate the semiconductors that bring forth information technology, communications, and scientific discovery, Ichor is enabling our customers to meet unprecedented demand for innovation. Our industry's growth is driven in part by advances in 5G, the internet of things (IoT), artificial intelligence (AI), high-performance computing and autonomous vehicles (AV).

Even through the uncertainty of the COVID-19 pandemic in 2020 and 2021, our team has maintained high-quality operations and we've ramped up production when needed. We're growing sustainably and organically; we're also growing through acquisition as we added the team from IMG to our operations in late 2021.

In order to guide our progress and growth as it relates to ESG topics, we formed an ESG steering committee. This group is empowered to set strategy and monitor progress in our ESG priorities and material topics. We conducted a materiality assessment, aligned with the Global Reporting Initiative (GRI) and the Sustainability Accounting Standards Board (SASB) frameworks. Through this process of engaging our customers, investors, and internal experts, we derived valuable insights into the most effective uses of our resources and set our top priorities for ESG disclosure.

We also established our baseline environmental impacts to ensure that we're setting worthwhile and appropriate goals for reducing emissions and waste. We are establishing effective environmental sustainability programs to reach those goals. For example, we're demonstrating success in working with our logistics partners to reduce the greenhouse gas (GHG) emissions related to shipping our products.

The Ichor team accomplishes amazing things when we work together and embody our core values. This year, we established our Diversity, Equity, and Inclusion (DEI) charter and launched our first Employee Resource Group (ERG) – in this case, focused on supporting the success of our women colleagues. We also found creative opportunities to serve our neighbors in communities around the world through local volunteerism and outreach events. We're proud to share some of these stories with you in this report.

In the year ahead, we will continue to focus on teamwork as we reach new heights as a company. By remaining focused on the opportunities ahead of us and on our strategic ESG goals, we look forward to meeting the key milestones that contribute to our customers' and investors' sustainability objectives. As we continue to play our role in this critical and dynamic value chain, we anticipate that our ESG investments will benefit our customers, partners, colleagues, shareholders, and communities.

Jeffrey Andreson

Chief Executive Officer and Board Member

Company Profile

Ichor is the leader in the design, engineering and manufacturing of critical fluid delivery subsystems and components primarily for semiconductor capital equipment, as well as other industries such as defense/aerospace and medical. Our primary product offerings include gas and chemical delivery subsystems, collectively known as fluid delivery subsystems, which are key elements of the process tools used in the manufacturing of semiconductor devices. Our gas delivery subsystems deliver, monitor and control precise quantities of the specialized gases used in semiconductor manufacturing processes such as etch and deposition. Our chemical delivery subsystems precisely blend and dispense the reactive liquid chemistries used in semiconductor manufacturing processes such as chemical-mechanical planarization (CMP), electro-chemical deposition (ECD), and wet cleaning. We also provide precision-machined components, weldments, e-beam and laser welded components, precision vacuum and hydrogen brazing, surface treatment technologies, and other proprietary products.

Ichor is uniquely positioned to help its customers meet the demands of next generation process technologies through our innovative products, world-class engineering, **value-added manufacturing**, efficient materials management, and precision testing capabilities.

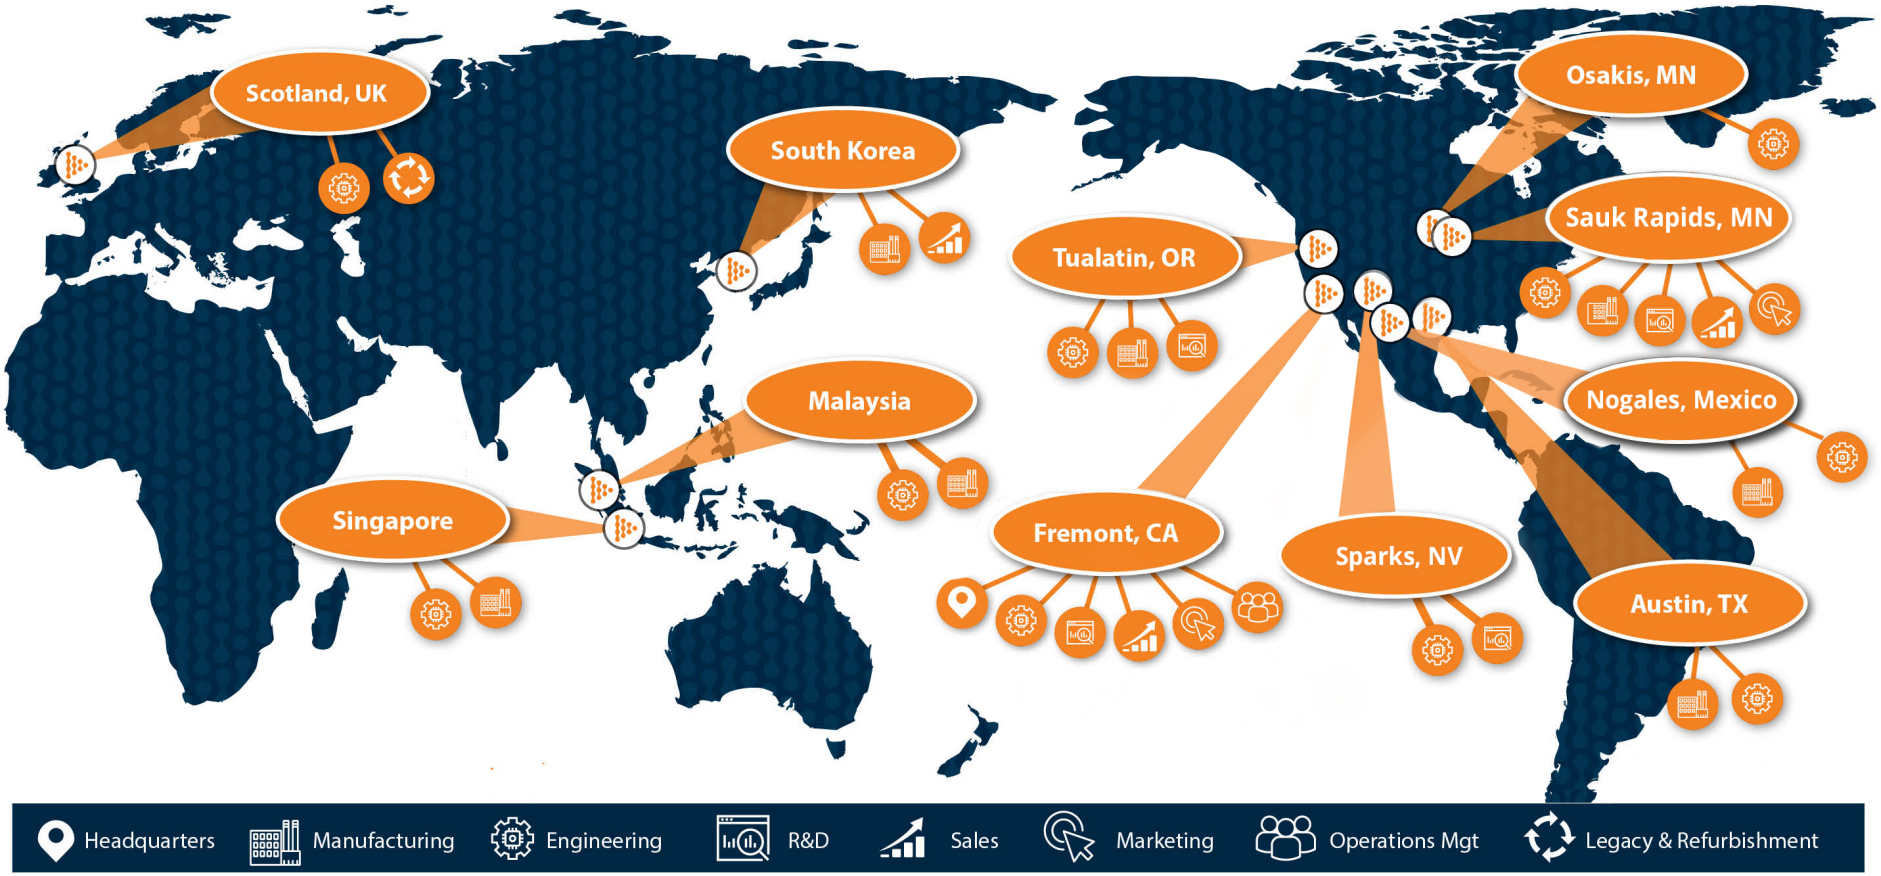

Company Highlights (as of December 31, 2021)		
ICHR on Nasdaq	Founded in 2009	$1.1B in revenue
Our gas modules account for about 12-15% of a semiconductor tool's cost of goods sold	Our chemical and process modules account for 25-45% of a semiconductor tool's cost of goods sold	Over 2,500 employees and associates worldwide

Our Sites around the Globe

We are strategically located to provide the highest level of customer service and support from our program management, sales, engineering, and executive management teams. Ichor is headquartered in Fremont, California, and we have manufacturing facilities in California, Oregon, Texas, Nevada and Minnesota (in the U.S.), Singapore, Malaysia, Korea, Mexico, and the United Kingdom. For more information, please see the **locations page** of our website. Our global supply chain includes over 700 suppliers across 10 countries on 3 different continents.

©2022 Ichor Systems

Our Core Values

Our Core Values represent our beliefs and guide our actions, behaviors, and decisions:

Innovation

We challenge ourselves to explore, innovate, and transform ideas into leading-edge products and best-in-class solutions

Collaboration

We operate with a disciplined and results-driven mindset, embracing each other's strengths, diverse backgrounds, and experiences to create an environment of inclusion

Honesty

We promote a culture of mutual trust and respect and demonstrate integrity in all we do

Operational Excellence

We demonstrate an uncompromising commitment to safety and quality and cultivate a culture of continuous improvement

Reliability

We hold ourselves accountable to deliver results and meet our commitments

©2022 Ichor Systems

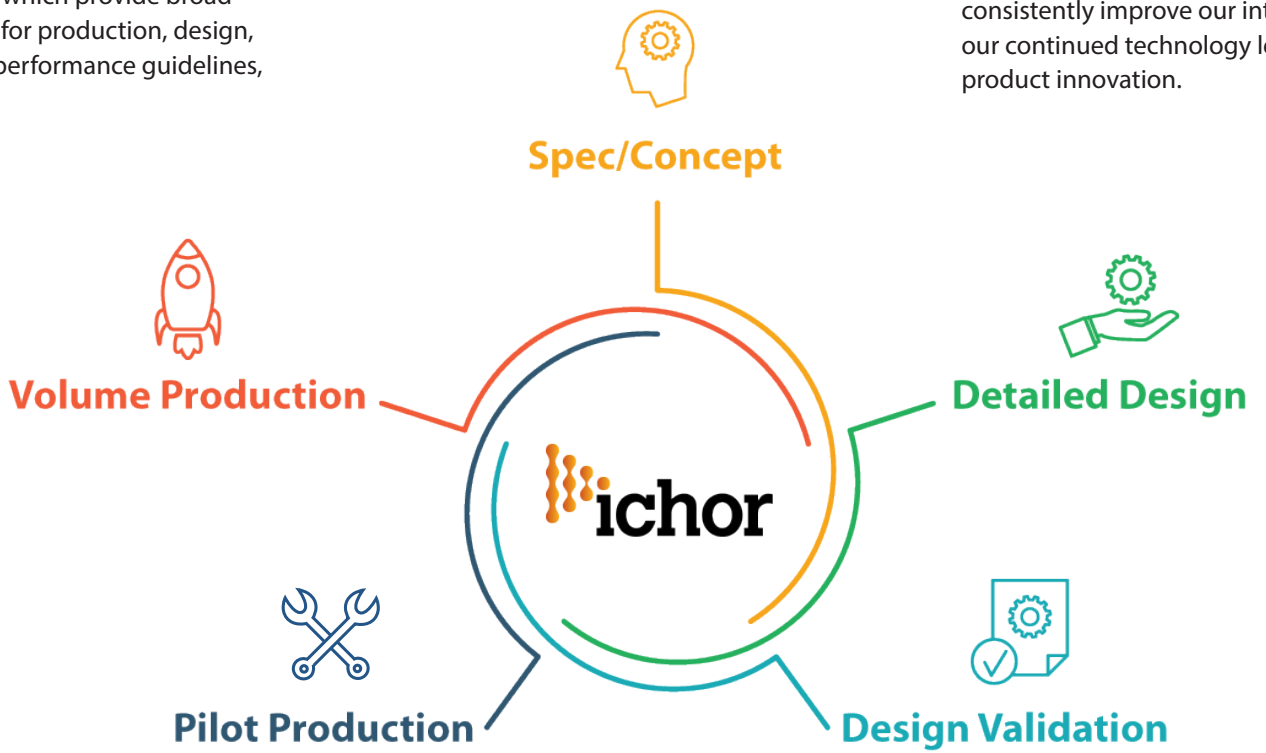

Innovation and IT Excellence

Our deep experience in integrated gas and chemical delivery solutions gives us insights into strategic innovation and continuous product improvements. We strive to enhance our manufacturing and product technology roadmaps to offer the highest value for our customers and meet their ever-evolving needs. Last year, we refined our product lifecycle process to better engage stakeholders and enhance collaboration among our internal teams.

In our product development process, we adhere to the SEMI Standards, ASME Standards, and other relevant industry standards which provide broad and comprehensive criteria for production, design, maintenance, ergonomics, performance guidelines, and waste and recyclability management. These standards offer Ichor the opportunity to enhance environmental, health, and safety considerations in a streamlined approach that will drive success for our business and our customers.

In the spirit of continuous improvement and innovation, Ichor sponsors a Continuous Improvement Program where employees can receive monetary awards for submitting ideas focused on improving safety, cost, quality, and delivery, and that show a commitment to supporting Operational Excellence, one of our Core Values. Global participation in this program has resulted in several strong contenders for the annual CEO award. The submissions that were the most innovative and impactful solutions, utilizing lean principles and cost savings measures for the company were considered for the CEO Award.

Despite the challenges of COVID-19, we're proud that we have been able to maintain high engagement with our customers and with our employees. The transition to remote work and online meetings has also allowed us to improve accessibility, communication, and collaboration within our company-wide teams, including our product innovation teams. We are leveraging these connections and striving to consistently improve our internal processes to ensure our continued technology leadership and product innovation.

©2022 Ichor Systems

Our Approach to Corporate Social Responsibility

We recognize that it takes commitment, dedication, and collaboration to address social and environmental challenges. We also recognize that these challenges are opportunities for us to engage with our partners throughout our value chain and create an exponentially larger impact. With this in mind, we are making efforts to create a more sustainable, diverse, and inclusive world through the pillars of Corporate Governance, Environmental Sustainability, and Social and Ethical Responsibility, as shared in this report. Below/to the right/etc., these pillars share the topics that are deemed as most material to our stakeholders, as shared in the "**Materiality of ESG Issues**" section of this report.

Ichor's management approach is based on our commitment to conduct business with the highest standards of ethics and corporate governance through our policies, practices, employee training, values alignment, and communication. We do this across the company, with our customers, and through our extended supply chain. We have procedures in place to ensure we follow all local and governmental regulations. Highlights of our governance practices can be found on pages 9-16.

We are committed to supporting programs that address issues such as climate change and sustainability and we are focused on reducing our carbon footprint, solid waste generation, and water consumption. We have initiated direct company initiatives and are collaborating with our customers and supply chain to achieve our goals. For example, we're working to reduce our carbon footprint through optimization of our facilities' energy use and transportation efficiency. See pages 17-21 for more information on our approach to environmental sustainability.

We are also striving to improve our diversity, equity, and inclusion practices in our workplace. We are creating a values-driven culture and we're investing in our employees' career growth through experience, engagement, and education. We also maintain the highest standards in employment regulatory compliance. On pages 22-30, we share details of our approach to social and ethical responsibility.

Corporate Governance

- Data Protection and Cybersecurity
- Product Safety and Quality
- Responsible Supply Chain Management
- Risk Management of ESG Issues
- Leadership Engagement and Accountability
- Transparency and Reporting

Environmental Sustainability

- Emissions Reduction and Management

Social and Ethical Responsibility

- Employee Health, Benefits, and Well-Being
- Employee Engagement and Development

Corporate Governance

We are committed to being a good corporate citizen and we demonstrate responsible business practices every day. In this section, we share our approach to managing ESG, ensuring ethics and compliance, and integrating quality into everything we do.

©2022 Ichor Systems

Governance at a Glance: 2021 Highlights
Reached 94% completion rate for global employee trainings
Conducted our first ESG materiality assessment
Maintained compliance to RSL, RoHS, and REACH

ESG Management and Reporting

We are committed to moving progress forward for our business, our customers, and our industry as a whole. We have established our ESG program and aligned the program's initiatives with our key stakeholders, industry best practices, and internationally recognized ESG rating organizations. Through regular engagement with our stakeholders, we receive feedback on priorities, expectations, and performance to guide our progress. As a trusted partner to our customers, we have implemented practices that allow us to make progress on our objectives while realizing operational resource efficiencies that meet both financial and environmental targets. We also collaborate closely with our vendors and suppliers for industry-wide progress.

In 2021, as part of our strategic planning activities, we launched our ESG steering committee, which is led by our Chief Human Resources Officer and works to develop our ESG roadmap, establish goals, and collaborate cross-functionally. To develop a strong foundation for our ESG program, this steering committee led the effort to conduct our first materiality assessment to prioritize our strategic ESG topics. In the coming year, we plan to leverage this work to set objectives and advance our progress on ESG management and transparent reporting.

Engagement with our Stakeholders

We value the relationships we have with each of our stakeholders, and we aim to always maintain open lines of communication. Our key stakeholders include our customers, employees, shareholders, suppliers, partners, and members of the communities in which we operate, as they have the most impact to our business. We engage these groups through quarterly business meetings, town halls, employee and customer surveys, annual forums, audits and assessments, and regular materiality assessments, which help us identify and prioritize the ESG issues that are most important to our stakeholders.

Ichor's ESG Mission Statement:

Our ESG initiative aims to reduce our global environmental footprint, support the education of our stakeholders, and promote a fair, ethical, and diverse working environment.

©2022 Ichor Systems

Materiality of ESG Issues

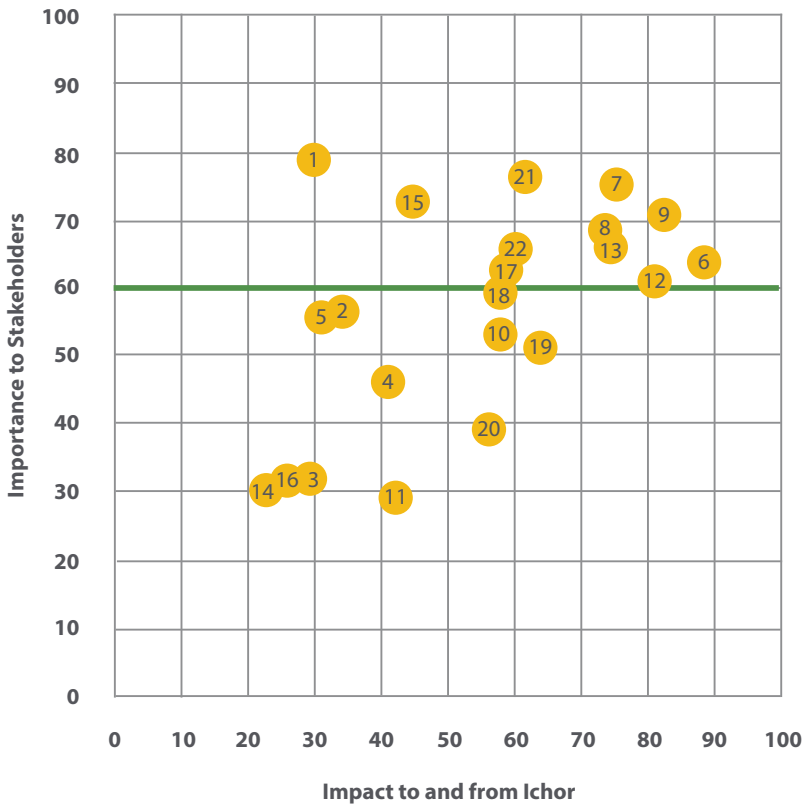

We strive to meet and exceed the expectations of our key stakeholders, and we work to align our priorities with theirs. In 2021, we conducted our first materiality assessment to determine which ESG issues are most material to our customers, employees, shareholders, and supply chain partners.

In this assessment, we evaluated and prioritized material topics in the categories of "environment", "human capital", "social capital", "business model and innovation", and "leadership and governance" based on how important the topics are, how much impact they have to our business, and how much impact Ichor can have to effect change. These prioritized topics help guide the development of our corporate social responsibility strategy and the content of our reporting.

The materiality framework we use follows industry standards and guidance set by the Global Reporting Initiative (GRI) and Sustainable Accounting Standards Board (SASB). This framework enables us to survey our stakeholders using a comprehensive set of industry-aligned ESG topics, giving us an excellent opportunity for in-depth discussions with each participant. The valuable feedback we received from our stakeholders will help us calibrate our efforts to become a more inclusive, sustainable, and socially responsible company.

In the matrix on the right, we share the results of this assessment. Topics that scored at 60% or above for Importance were identified as material to our business and our stakeholders in our 2021 assessment, though all topics included in the assessment will continue to

Materiality Matrix

1. Emissions Reduction & Management
2. Energy Consumption & Renewable Sources
3. Water Management
4. Waste Treatment, Management & Recycling
5. Design for Environment
6. Employee Health, Benefits & Wellbeing
7. Employee Engagement & Development
8. Diversity & Inclusion
9. Occupational Health & Safety
10. Responsible Labor Practices
11. Community Engagement & Giving
12. Data Protection & Cybersecurity
13. Product Safety & Quality
14. Universal Human Rights
15. Responsible Supply Chain Management
16. Conflict Minerals & Responsible Sourcing
17. Risk Management of ESG Issues
18. Innovation for Responsible Design
19. Regulatory Compliance & Emerging Issues
20. Business Ethics & Anti-Corruption
21. Leadership Engagement & Accountability
22. Transparency & Reporting

©2022 Ichor Systems

be monitored for performance and compliance. A full list of these material topics, their definitions, and their alignment with GRI, are found in **Index B: Material ESG Topics Index** on page 31 of this report.

Business Integrity, Ethics and Compliance

Having a culture of trust and compliance is essential to the integrity of our business. We expect every employee at Ichor to be responsible for upholding our standards of conduct, ethics, and accountability. We have robust policies to make these expectations clear and to guide our employees in making good decisions, including our **Code of Business Conduct and Ethics**, which is available on our website. Our CEO is accountable for the review and maintenance of these policies and the oversight of our ethics and compliance program.

Each year, we review our policies and procedures to ensure they are up to date with our ethics and compliance standards. In 2021, to ensure global consistency across our company and subsidiaries, we completed an extensive review of our Code of Business Conduct and Ethics. We also complete ethics and compliance internal audits with our management-level employees on a quarterly basis to maintain active engagement with potential risks. To combat corruption and unethical behavior, our Board of Directors has adopted **Clawback**, **Conflict Minerals**, and **Insider Trading** policies, and **Corporate Governance Guidelines**.

Ichor is committed to fair dealing with our customers, vendors, and suppliers, and continued compliance with competition and antitrust laws which prevent interference with a competitive market system. Employees are prohibited from offering or accepting any form of bribe, kickback, or inducement to or from any person.

Our management personnel are also expected to promote our "open door" policy – ensuring that they are available to anyone with ethical concerns, questions, or complaints. Our employees are encouraged to confidentially raise any concerns they have through our toll-free ethics complaint hotline. Employees are made aware of the hotline during onboarding training and are reminded of this tool during annual training. Reports made through the hotline are expediently reviewed by our Compliance Officer, and our Chief Human Resources Officer is responsible for ensuring a fair and through investigation of the facts, and that no retaliatory action be taken against any employee for raising concerns, questions, or complaints in good faith. High priority issues are escalated to the Board of Directors as needed. Ichor was not assessed any fines for non-compliance in 2021.

Cybersecurity and Data Protection

With honesty and reliability as our core values, we are committed to upholding robust cybersecurity standards and to protecting the personal data of our employees, customers, suppliers and partners. As our IT program is growing and expanding, we work closely with internal stakeholders to set our IT priorities in line with our business needs and core values.

Our cybersecurity strategy aims to reduce our exposure to risks such as ransomware, data loss, and lost or stolen assets. Each year, we review all relevant policies and protocols to ensure we're maintaining best practices in network hygiene, and that we're protecting our business from potential threats. This review is administered by our Chief Information Officer and the information systems team, and updates are made based on cyber threat landscape.

We invest in security and firewall management improvements each year to provide additional defensive layers for data and information. We made several advancements in security protocols to improve our data protection. In the coming year, we will implement proactive system monitoring to address potential threats before they occur. We will also expand our risk exposure planning by completing tabletop exercises with our key stakeholders to ensure we have the tools to protect against cyber threats and maintain business continuity. In 2021, there were no material data breaches.

©2022 Ichor Systems

Over the last few years, we have worked to maintain a secure remote work environment for our employees. We regularly communicate security best practices and preventative measures to all Ichor employees, ensuring they have the tools and training necessary to protect their information and that of the company. Last year, we began the deployment of a globally integrated cloud-based employee resource planning (ERP) system to improve all employees' access to business-critical applications from any location and to standardize management systems and data nomenclature. Alongside this change, we implemented a single sign-on workflow with multi factor authentication to mitigate security concerns. Along with providing enhanced security, these improvements supported our employees' ability to work from home during the COVID-19 pandemic. In the coming years, we plan to review the data from the ERP system to enable management decision-making and improving efficiencies in business processes.

Ichor is dedicated to protecting the privacy of the personal data of its employees and stakeholders in accordance with the General Data Protection Regulation (GDPR) and California data protection initiatives. We have established an internal GDPR cross-functional working group which includes members from our IT, HR, and Legal teams. These teams collaborate with all departments and functions to survey, educate, create and implement policies and procedures, conduct data mapping, and formulate subject data request response protocols. Ichor's external **Privacy Policy** can be found on our website. All Ichor employees receive GDPR awareness training upon hire and thereafter on an annual basis.

Product Quality and Compliance

At Ichor, quality is embedded in everything we do. We prioritize meeting or exceeding our customers' requirements for on-time delivery while demonstrating our core values to achieve operational excellence. We are proud of our ability to scale our business in step with our partners and strive to continuously improve the accuracy, performance, and efficiency of our products. The Quality Management System at each of our U.S. sites is certified to ISO9001:2015 International Standard. In addition, our Singapore and Korea sites are also certified to the ISO9001:2015 standard. Our remaining international sites in Malaysia and Scotland are aligned with Ichor's Quality Management System and are working toward certification by the end of 2022.

We have the expertise to manage all hazardous waste safely and responsibly. We maintain compliance with all applicable regulations, including the Restricted Substances List (RSL), the Restriction of Hazardous Substances in Electrical and Electronic Equipment (RoHS), and the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) to manage materials safely and source materials responsibly. Last year, we developed a deeper vetting process to improve cross-functional coordination with our Materials and Design team. We plan to integrate this process into our validation procedures to unify design and compliance more effectively.

©2022 Ichor Systems

Customer Engagement and Satisfaction

At Ichor, we are dedicated to the success of our customers and stakeholders by advancing technology and providing innovative, world-class products and manufacturing services. We regularly engage with our customers to ensure satisfaction at every stage of design, production, and delivery, including through quarterly business reviews, customer surveys, and company scorecards.

We are committed to the principles of the RBA Code of Conduct relating to labor, health and safety, environment, and ethics. We have numerous feedback loops to continue improving upon our ESG performance. Each year, we complete the Responsible Business Alliance's (RBA) corporate-level and facility-level self-assessment questionnaires and share the results with our customers. This assessment questionnaire ensures our products are manufactured responsibly, following all applicable environmental and labor expectations. Our customers provide feedback through scorecards and regular business reviews to further refine our ESG, quality, technology, logistics, and cost efficiency considerations.

We screen new customers through the Bureau of Industry and Security (BIS) to ensure our products and services are sold and delivered in compliance with U.S. import and export licensing requirements, and we communicate to our management team regular updates to the BIS consolidated screening list. Employees also receive annual Trade Compliance training through IchorTrainer, our employee learning platform.

©2022 Ichor Systems

Supply Chain Management

At Ichor, we strive to affect industry change through collaboration with our business partners across the value chain. Through the lens of each of these elements, we have the opportunity to partner with our suppliers and customers on innovative ways to push technology forward.

Our supply chain management program is governed by our **Supplier Handbook and Code of Ethics**, which is integrated into contract agreements with partners. The supplier handbook reflects our core values and defines our expectations for suppliers' adherence to ethical and legal standards. Included in the handbook are our compliance guidelines and select business operations procedures. Each year, our Supply Chain and Procurement teams are responsible for reviewing the supplier handbook, collecting feedback from stakeholders, and ensuring consistency across global sites. Suppliers are also trained on the handbook annually and are expected to confirm that they have reviewed it thoroughly.

We strive to foster open and collaborative communication with our suppliers through a number of channels. Each year, we host an annual supplier symposium with our top 20 supply chain partners to discuss opportunities, challenges, risks, and upcoming production goals. We also require that suppliers complete a self-assessment twice per year to identify supply chain vulnerabilities, guide improvement plans, and ensure that our suppliers contribute to our customers' goals and expectations.

©2022 Ichor Systems

The assessment covers manufacturing topics such as capacity, materials, and production control systems, and evaluates business operations including financial health and business continuity. Approximately 65 of our top suppliers, which covers roughly 90% of spend, are requested to complete the assessment. The assessment is reviewed regularly by our supply chain managers - in the coming year, we will integrate ESG performance metrics into the risk assessment process.

The COVID-19 pandemic has presented global challenges for all industries and, due to the nature of the semiconductor industry, we experienced an imbalance of materials and staffing. In the face of shutdowns that disrupted the global supply chain, we explored numerous risk mitigation strategies including leveraging multi-origin sourcing, increasing time allocations to account for interruptions, and investing in optimized scheduling tools. As we continue to confront some levels of unreliability, we are building on our communication and logistics protocols to ensure success for our company and for our customers.

Responsible Sourcing and Conflict Minerals

We are responsible for our products, beginning with the raw materials that help create them. Through our conflict minerals compliance program, we monitor our sourcing of tin, tantalum, tungsten, and gold, as well as other minerals of concern, such as cobalt (also known as 3TG and conflict minerals). These minerals, from the Democratic Republic of the Congo and surrounding regions, are at significant risk of being mined and sold under circumstances of extreme violence and human rights abuses.

Ichor has a strong due diligence process to ensure we source our materials responsibly. Our commitment and compliance protocol are outlined in our **Conflict Minerals Policy**, which is available publicly at **www.ichorsystems.com**. Our conflict minerals compliance program follows the Responsible Minerals Initiative (**RMI**)'s guidelines and supports the RMI's Responsible Minerals Assurance Process (**RMAP**). It includes the following steps and key activities:

1

Establish Strong Company Management Systems

- Maintain conflict minerals policy, internal management system, and supply chain control systems
- Engage with suppliers, provide grievance mechanism
- Maintain Records

2

Identify & Assess Risk in the Supply Chain (Reasonable Country of Origin Inquiry)

- Evaluate products for use of minerals
- Identify suppliers of covered products
- Request and evaluate CMRTs
- Engage with suppliers to confirm data
- Determine RMAP conformance and risk level

3

Design & Implement a Strategy to Respond to Identified Risks

- Encourage suppliers not yet conformant to RMAP to join RMI and become conformant
- Work with suppliers to remove high risk smelters or refiners from supply chain if needed
- Report on risk mitigation efforts to senior management

4

Support Independent Third-party Audits of Smelters & Refiners

- Review and report on third-party audits conducted on smelters and refiners
- Leverage RMI's RMAP audit status of smelters and refiners as reported by suppliers

5

Report on Supply Chain Due Diligence

- Report on conflict minerals due diligence and risk mitigation activity as required by law

©2022 Ichor Systems

Environmental Sustainability

Our aim is to be good environmental stewards and reduce our environmental footprint within our operations. In this section, we share how we responsibly manage our energy, emissions, water, and waste to progress on our commitment to sustainability.

©2022 Ichor Systems

Environmental Sustainability at a Glance: 2021 Highlights
Recycled over 50% of our solid waste
Offset over 1,500 metric tonnes of CO_2 in 2021 with carbon neutral shipping
Signed a Letter of Intent with a key customer for environmental progress

Environmental Stewardship

At Ichor, we are committed to supporting programs that address climate change and other sustainability opportunities. Within our operations and throughout our value chain, we are focused on reducing our carbon footprint, our solid waste generation, and our water consumption. In the next year, we plan to expand our internal management approach to material environmental topics, develop reliable tracking procedures, and leverage existing data to set and achieve our goals in the coming years.

Using guidance from the Environmental Protection Agency (EPA), we've initiated data collection efforts for utilities (electricity, water, and natural gas) at all of our U.S. sites, with the exception of sites newly acquired from IMG. In 2022, we will extend this approach to more of our global manufacturing sites including Scotland, Korea, Mexico, Singapore, and Malaysia.

We work closely with our customers and suppliers to mitigate our environmental impact in the global supply chain and to support our customers in reaching their sustainability goals. Through these partnerships we've identified opportunities to incorporate environmental considerations into our existing processes, including our supplier assessments and factory audits. We look forward to enhancing our future ESG reporting with carbon-equivalent emissions data, to continue supporting our business partners, and to hold ourselves accountable for change.

Energy Management and Emissions Reduction

We aim to reduce our carbon footprint by reducing our energy usage and our GHG emissions. In 2021, we initiated a process to establish baseline metrics for our energy consumption and our emissions that will inform our future reduction targets. In this baselining activity, we inventoried the data that are readily available in our existing operations to identify the climate metrics that can be reported on in the near-term. Next, we collected data from those sources and aggregated them for analysis and disclosure in 2022. This will give us a reliable launching point for measuring our impact, reducing our emissions, and reporting on both to maintain accountability.

Below is an account of our energy consumption data as well as our Scope 1 and Scope 2 emissions

In 2021, Ichor partnered with ASML in signing their Letter of Intent (LOI) to work towards improving the environmental sustainability of the semiconductor industry. The LOI articulates our commitment to setting ambitious carbon emissions reductions targets and will advance the industry as a whole in environmental stewardship.

©2022 Ichor Systems

for our U.S. sites in 2021. Over the past year, we have worked to analyze our employee travel and commuting data, allowing us to begin baselining our estimated Scope 3 emissions for business travel. We have also expanded our data collection and customer and supplier engagement strategies to include more of our Scope 3 emissions. Over the next year, we will baseline these figures and set reduction targets, and we plan to disclose our Scope 3 emissions in future reporting.

Energy Consumption* (Megawatt Hours)

	2021
Total consumption	12,619

GHG Emissions* (Metric tonnes of CO2 equivalent)

	2021
Scope 1	296
Scope 2	5,874
Total	**6,170**

*For this year's report, we are not including environmental data from our IMG sites, which were acquired in late 2021.

Reducing our Carbon Footprint in Shipping

We work strategically with our suppliers to reduce our carbon footprint and minimize our Scope 3 emissions. For example, we have partnered with CH Robinson for comprehensive emissions tracking and reporting. Through this innovative partnership, we've been able to track emissions and logistics data for over 95% of our domestic less-than-truckload shipments with the company. These shipments are individually weighed and measured, allowing us to improve our analysis of freight transportation efficiency. Reporting is conducted through a partnership with the Environmental Protection Agency's SmartWay program, which tracks data across many freight industry sectors. The reported results compare Ichor's emissions data with other customers and provide us with industry averages that we can use to benchmark our performance and improve our programs further. We are continuing to explore opportunities to optimize our shipping to mitigate GHG emissions from transportation.

Shipping GHG Emissions (Metric tonnes of CO2 equivalent)

UPS Packages that are carbon-neutral	100%
Percent of Ichor packages shipped through UPS	60%
Metric Tonnes of CO_2 Offset in 2021	1,557

©2022 Ichor Systems

Through our collaboration with UPS, we have been able to implement innovative processes to offset over 60% percent of our freight transportation emissions. Through UPS' tracking tools, the carbon impact of our shipments is measured and calculated, and we are able to offset our emissions. This carbon-neutral shipping option has been verified through the world-renowned third-party verification organization, Société Générale de Surveillance (SGS).

Waste and Materials Management

We strive to reduce the waste materials generated throughout our operations, and we consistently look for opportunities to improve resource efficiency and waste reduction and recycling. We are proud that in 2021, we were able to recycle over 50% of the solid waste we generated. We know that collaboration with business partners can enable us to make a greater impact, so we seek out strategic waste reduction opportunities with suppliers and vendors wherever possible. For example, at our site in Tualatin, Oregon, we have partnered with a vendor that helps us recycle our plastic chip waste.

Packaging

We recognize the impact that our packaging materials can have on the environment. As such, we are committed to understanding that impact and participating in initiatives that make improvements across the value chain.
Through partnerships with our valued customers, we are working on initiatives that help minimize waste from packaging. We have designated teams responsible for participating in these initiatives to ensure we help our customers meet their environmental goals. These teams work to measure the recycled content in packaging and evaluate our packaging suppliers for better, more efficient options. In the coming years, we will continue to expand and build on these initiatives and on other innovative partnerships with our customers.

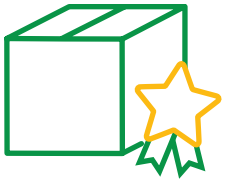

Water Management

At Ichor, our manufacturing processes are not large consumers of water, however, we understand the crucial role that water plays in all aspects of our lives. We collect water consumption information at each of our U.S. sites, allowing us to understand our impact and determine our ability to reduce our water usage. We will continue to use this data to inform our water management strategy and guide us in setting goals in the coming years. We're also working to improve out data collection at our sites around the globe for tracking, reducing, and reporting purposes.

We ensure each of our sites is compliant with local requirements and regulations. In the limited cases where wastewater is generated in our manufacturing processes, it is treated prior to being discharged.

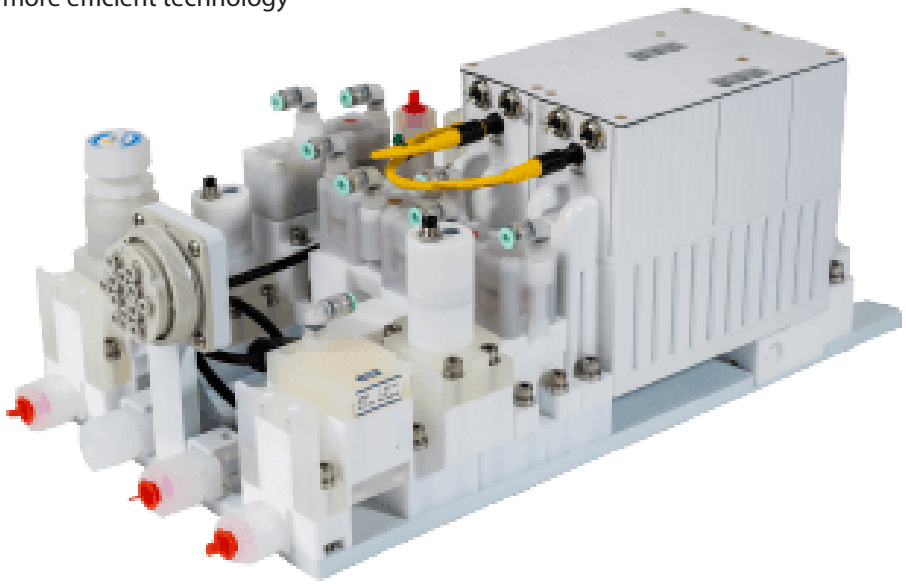

©2022 Ichor Systems

Creating Responsible Products

We design our products to exceed our customers' expectations and to help them meet their sustainability goals. We recognize that our products will be used for years by our customers in their processes and that it is important that they operate efficiently, reduce waste, and improve yields. Through our refined product development process, we are integrating best practices and processes that enable us to minimize energy use and waste generation. By mapping our product lifecycle, we facilitate an integrated approach to continuously evolving opportunities to reduce our environmental impact. Read more about our product development process in the "**Innovation and IT Excellence**" section of this report.

Our engineers and R&D team members are dedicated to delivering new inventions to improve the efficiency of our fluid delivery systems. Our newest Integrated Manifold System (IMS) architecture yields an advanced wet fluid delivery system that is smaller than current technology. This accomplishment impacts our customers by reducing the physical footprint of equipment in semiconductor fabs, which reduces their power and chemical consumption and results in lower carbon emissions for less environmental impact. Our new products such as our Advanced Flow Controllers are designed to decrease gas consumption through faster response time. This results in higher process throughput and significantly less consumption of gas during process settling time. In addition, the smaller size of Ichor's IMS product requires lower quantity of raw materials to manufacture, smaller packaging and efficient transportation of outgoing products. We continually work to design more efficient technology for our served industries.

Social & Ethical Responsibility

We strive to provide a safe and inclusive workplace and give back to our local communities. In this section, we share our approach to employee development, diversity, equity, and inclusion, health and safety, and community engagement.

©2022 Ichor Systems

Social and Ethical Responsibility at a Glance: 2021 Highlights
Initiated a Diversity, Equity, and Inclusion (DEI) vision, strategy, and launched employee training on DEI
Launched our first ERG, Women of Ichor
Completed a market-based pay parity study to support competitive offerings to employees globally
Participated in community initiatives around the world

Our Employees

We are proud to have cultivated a workforce that embodies our values of innovation, collaboration, and honesty. We are committed to investing in our employees' career growth through experience, engagement, and education, while maintaining the highest standards in employment regulatory compliance. By the end of 2021, we had 2,539 full time and temporary employees working at Ichor globally.

Employee Engagement

We strive to provide a work environment that encourages collaboration, innovation, and engagement from within our workforce. It is important to us that our employees around the world feel valued and heard - to that end, we encourage an interactive feedback loop to advance employee engagement. As a component of our culture evaluation in 2021, Ichor developed a survey to better understand the values that are most important to employees and identify opportunities for improvement. This survey also solicited employees' views of Ichor and Ichor's management team, so we can continue to improve our communication, recognize outstanding employee performance, and foster a cohesive company culture. The survey was composed of roughly 30 questions and included all employees globally.

©2022 Ichor Systems

As a response to the feedback we received from this survey, we improved our quarterly employee newsletter to include updates on our progress toward leaderships' goals and added content to highlight the inspiring work of our employees. At our sites across Asia, we initiated local monthly newsletters to keep our employees apprised of upcoming events, safety best practices, and community activities. We also report on past events, share photographs, recognize service, and highlight achievements from local sites.

Our global communications program was also enhanced to include quarterly updates from our CEO following the release of quarterly earnings reports. These correspondences provide our employees with insights into Ichor's financial performance, company goals and vision of success. In addition, our CEO orchestrated a series of "skip-level" meetings to foster communication within our organization. We look forward to continuing to build on these employee communication and engagement initiatives next year.

Learning, Development, and Culture

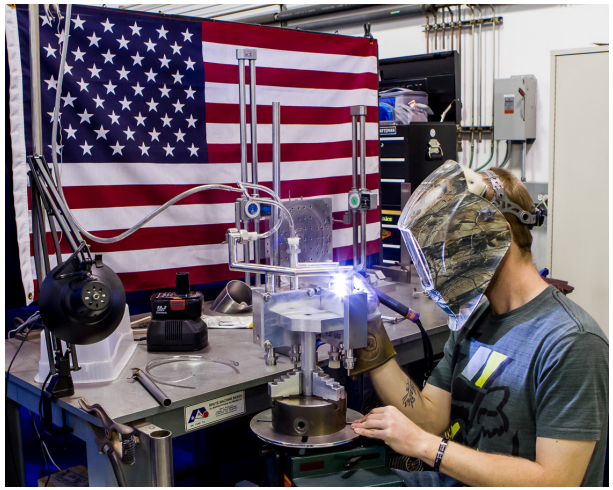

Over the last year, we've focused on streamlining our employee human resources systems and operating procedures with both a top-down and bottom-up approach. We made infrastructure enhancements, including the implementation of a global, cloud-based human resources information system to improve our people management details.

Ichor is committed to providing learning and development opportunities for each of our employees, enabling us to foster a safe, inclusive, and collaborative working environment. Through the use of IchorTrainer, our comprehensive learning platform, we are able to integrate regular training into our employees' workflow, maintaining a culture of accessible learning and continuous improvement. IchorTrainer assigns each employee training modules specific to their roles, which are required for completion on a monthly basis. Employees complete training on a number of topics including, but not limited to, safety, ethics and compliance, human resource policies, diversity, equity and inclusion, IT standards, and data protection and cybersecurity. The training modules are reviewed by our Human Resources (HR) department and functional subject matter experts each year to maintain accuracy and relevance.

Last year, we initiated a culture program called OneIchor to unify and strengthen the culture of our company. We established Value Teams, composed of employees around the world who are committed to enhancing the embodiment of our company values and creating a supportive work environment. We will continue to build on these engagement efforts to forge a workforce that is interconnected globally, functionally, and always focused on delivering customer excellence.

Employee Training

Our aim is to provide consistent and comprehensive training for all employees. On average, each of our employees participate in over 21 hours of training per year. Our goal is to achieve a 100% completion rate for mandatory training, such as Safety Practices, Diversity and Inclusion, and Ethics and Code of Conduct compliance. We're proud that in 2021, we achieved a 94% completion rate at our sites around the globe.

Managers at Ichor are also provided with enhanced training through a program called HR Connect. In HR Connect, managers participate in training sessions focused on developing their people management, workplace inclusion, and leadership skills. Examples of these training opportunities include candidate interviewing, open enrollment protocols, salary planning, performance management, and engagement.

Ongoing Education

Ichor believes both employees and our company benefit when our employees increase their job-related skills and knowledge through academic study. Therefore, we provide an educational assistance program for regular full-time employees in good standing. Through this program, Ichor reimburses tuition, required textbooks costs, and lab fees for courses, determined to be job-related, which are successfully completed at an accredited technical or trade school, college, or university. Once a course is approved, we are proud to reimburse up to $7,500 each calendar year to qualified participants meeting the conditions of the program.

©2022 Ichor Systems

Diversity, Equity, and Inclusion

Ichor believes that Diversity, Equity, and Inclusion (DEI) is foundational to building a sustainable and scalable company. We strive to attract and retain a productive workforce committed to our principles, both in the workplace and in our served communities.

Ichor strives to be a trusted partner in our highly dynamic industry, and we recognize the importance that DEI has to the success of our business and to the needs of our stakeholders. As a demonstration of our commitment to the well-being of our workforce, we have established a new position, Head of Corporate Social Responsibility, which includes DEI. This role is charged with leading our DEI program, alongside our Chief Human Resources Officer, and integrating best practices throughout our business operations. In 2021, we also established our DEI charter to demonstrate our commitment to ensuring we include principles of DEI in everything we do.

In 2021, we are proud to have launched our first Employee Resource Group (ERG): Women of Ichor. This ERG provides a space for the women of Ichor to engage with each other, share experiences and best practices, and develop their skills. Over the next year, we plan to grow this group into a platform for mentorship and career development. We also intend to form additional ERGs, organized by employees and for employees, to celebrate the multitudes of identities across Ichor.

Last year, we also launched a foundational DEI training module to help build a workforce that is educated on topics of equity and inclusion. The training model was assigned to all employees and will be required for new employees going forward. Our leadership teams also participated in a micro-inequities training which will continue to be expanded upon in the coming year.

Employee Diversity Data

We value diversity as a collection of differences and are proud to celebrate and encourage those differences. Ichor strives to create working environments that emphasize respect, openness, and diversity. The following data represent the U.S. workforce. We know we have more progress to make in achieving a more diverse workforce and look forward to the opportunity to demonstrate our commitment to diversity, equity, and inclusion in the years to come.

Discrimination, Harassment, and Equal Opportunity

Ichor is committed to providing a work environment that is free from any form of discrimination or harassment on the basis of race, ethnicity, gender, national origin, color, creed, ancestry, citizenship, religion, age, physical or mental disability, medical condition, genetic information, medical condition, pregnancy, marital status, sexual orientation, gender identity or expression, military or veteran status and any other status protected by law.

In our **Employee Code of Ethics and Business Conduct**, we outline our policy to provide an equal opportunity to all employees with regard to hiring, pay rates, training and development, promotions, and other terms of employment, in compliance with all applicable employment laws. Complaints of harassment or discrimination will be investigated

Last year, we implemented a DEI framework to strengthen our principals and formulate commitments for advancing values into action. This framework emphasizes:

- Hiring
- Onboarding
- Safety
- Career Development
- Pay
- Decision making
- Meetings and collaboration
- Learning and development

©2022 Ichor Systems

promptly and thoroughly. Employees who engage in acts of harassment and discrimination are subject to corrective action that may include termination of employment.

DEI Governance and Recruitment

Within Ichor, we seek to actively promote candidates from within and remove barriers to recruitment opportunities to build a pipeline of leaders. In 2021, we chartered our Chief Human Resources Officer (CHRO) to lead the enrichment of our culture with Diversity Equity and Inclusion principles. In the next year, we plan to advance our intentional recruitment efforts and continue facilitating an inclusive environment to attract and retain employees from underrepresented communities. As an extension of Ichor's internal hiring practices, placement agencies that we engage are contractually committed to conformity with the Equal Opportunity Commission's guidelines for non-discrimination.

The Nominating and Corporate Governance Committee and the Board of Directors value diversity and believe that our Board should be composed of individuals with knowledge and experience in many substantive areas that impact our business, including a diverse set of viewpoints, backgrounds, skills, experiences, and expertise. In addition to reviewing these factors, the Nominating and Corporate Governance Committee and the Board of Directors ensure that the pool of qualified persons to be considered for directorship include those who bring gender and ethnic diversity. At the time of this report publishing, 33% percent of our Board members are women. As future Board positions occur, we will seek diversity in all qualified candidates.

Percent of U.S. population by race/ethnicity	2019	2020	2021

Employee Wellness, Health, and Safety

The health, safety, and well-being of our employees is vitally important to us. Our environmental, health, and safety (EHS) manual provides uniform policies and procedures to guide our employees in fostering a safe and effective working environment. Moving forward, we intend to complete a comprehensive review of our EHS organization and policies to assess areas of improvement and plan for resource allocations to scale the program in alignment with our business operations.

At the outset of the COVID-19 pandemic, we established a business continuity council with our leadership team to monitor the fluidity of regulations and to proactively mitigate risks to employees. The council conducts regularly scheduled meetings to manage changes in operations, training, and communications procedures. With the continuing challenges of the COVID-19 pandemic, we are giving employees the flexibility to address their individual needs and prioritize their health. We enabled flexible work and - where possible - leveraged remote and hybrid working environments to minimize exposure to the virus and protect the health of our employees. An added benefit of these remote arrangements is a reduction in fossil fuel consumption from employee commuting.

Safety Performance

At Ichor, we have a safety-first culture. We work to foster this culture through regular and open communication with our employees and we begin with safety in each meeting. We also provide safety education materials and offer a safety incentive program to ensure that safe working practices remain the focus and the commitment for all our employees. Our training platform, IchorTrainer, enables us to provide each employee training modules that are specific to the safety procedures they need for their role. We set a goal for our new hire and monthly safety training of a 100% completion rate and we track our progress regularly. Read more about our training procedures and process in the "**Employee Training**" section of this report.

We monitor safety metrics diligently, hold regular site-specific safety inspections and committee meetings, and incorporate summarized metrics into a monthly scorecard that is shared with senior management around the globe. These metrics also inform the content on our learning platform, IchorTrainer, which is reviewed in our annual safety review session with executive leadership. This review session provides our leadership team the information needed to

©2022 Ichor Systems

identify safety trends and develop action plans to mitigate risks. Ichor was not assessed any fines for noncompliance in 2021.

Wages and Benefits

Ichor is proud to be an employer of choice in our industry and to offer compensation packages that reflect our team members' valuable talent. We strive to offer competitive benefit packages in each of our sites around the world.

In 2021, we partnered with an independent third party to complete a market-based pay study to ensure our salary ranges are aligned with industry trends. In 2021, we leveraged the results of this assessment to determine appropriate performance-based compensation adjustments.

Last year, we expanded our benefits offerings for employees and their families at our largest operational sites in the U.S. and Malaysia, including offering no-cost healthcare options in some regions. We are proud of our ability to make healthcare accessible for our employees. Our focus on the mental and physical health and well-being of our workforce extends to education regarding the importance of proper ergonomics in the workplace, as well as offering benefits that cover mental health and crisis counseling, along with resources promoting the benefits of good nutrition and exercise. Virtual Visits and Virtual Therapy medical options are of particular value as we face the challenges of COVID-19. In 2022, we will continue using these processes for evaluation of employee wages and benefits, to ensure we are appropriately recognizing the value our employees bring to Ichor. We plan to continue expanding upon our wellness and mental health offerings.

We are proud to support the next generation of the U.S. manufacturing workforce. In Minnesota, Ichor sponsored two scholarships at technical colleges: Alexandria Community and Technical College and St. Cloud Community and Technical College. Ichor's $2,500 gift will be matched with state grant funds, allowing two students to receive a total of $5,000 each from the Workforce Development Scholarship to be used for their credential, certificate, or degree.

Human Rights in our Operations and our Supply Chain

We are dedicated to upholding the human rights of our employees and of our stakeholders in our supply chain. We are committed to complying with all applicable laws and regulations that prohibit activities involving forced labor, slavery, human trafficking, and child labor. These requirements are defined and made publicly available in our **Employee Code of Business Ethics and Conduct** and our **Supplier Handbook and Code of Ethics**, which are available on our public website. Our business practices are in alignment with the **Responsible Business Alliance (RBA)** framework and code of conduct.

Additionally, we support our employees' rights to unionize and bargain collectively. As of December 2021, no part of our workforce was covered by collective bargaining agreements.

©2022 Ichor Systems

Community Engagement and Philanthropy

We strive to be a valued and engaged corporate citizen in the communities in which we operate around the globe. Each of our sites is committed to identifying opportunities to volunteer, participate, and give back to local causes and community efforts. We realize that there are many worthy organizations to which financial and nonfinancial contributions can be made by Ichor, and we consider and make financial contributions on a case-by-case basis to 501(c)(3) corporations, non-profit institutions and organizations which are in the communities where we operate.

Throughout the U.S., Ichor employees participated in food drives during the Thanksgiving and winter holiday seasons. Ichor matched thousands of dollars of personal online donations made by our employees to their local food banks as part of Ichor's Holiday Food Drive. We also collected canned goods to share with underserved communities. Several of our sites in the U.S. also participated in the Marine Corps' Toys for Tots program including Texas, Oregon, and Minnesota. Through the generosity of our employees, Ichor contributed to children and families during the holiday season.

In Singapore and Malaysia, employees laced up for a virtual run, where employees ran over 100,000 steps, allowing them to get active and help in supporting local charities!

Report Indices

Index A: Memberships and Associations
Index B: Material ESG Topics Index
Index C: GRI Core Content Index
Index D: SASB Material Metrics

Index A: Memberships and Associations

Ichor is a proud supporter of multiple external frameworks and initiatives, listed below:

- Responsible Business Alliance (not as a member, but have adopted guidelines)
- SEMI (not as a member, but have adopted guidelines)
- CISE (Consortium of Infosec Executives)

Index B: Material ESG Topics Index

Our material topics were identified through our 2021 materiality assessment. The topic boundary is contained within company operations, and the explanation of the material topics is included in the 'Topic Description' below. Our management approach and outcomes are described in the correlating report chapter, referenced in the "Section of this Report" column below.

Ichor's Material Topic	Topic Description	Section of this Report	GRI Disclosure
Data Protection and Cybersecurity	Includes the company's data collection, data protection, and privacy policies and practices, as well as its cyber and IT security practices and incident response.	Cybersecurity and Data Protection	GRI 418
Product Safety and Quality	Refers to the company's efforts to mitigate issues involving unintended effects of products sold that may create health or safety risks to end-users. Addresses the company's ability to offer manufactured products that meet customer expectations with respect to their health and safety characteristics. Acknowledges the company's efforts to supply products that meet and/or exceed quality expectations while maintaining high standards of safety.	Product Quality and Compliance	GRI 416
Responsible Supply Chain Management	Ensures the company's existing and potential suppliers are screened using environmental, social, and governance (ESG) criteria and that suppliers' performance in these areas is considered for continued business. Includes regular risk assessments of supplier performance, such as surveys and audits, as well as trends of performance over time.	Supply Chain Management	GRI 308; GRI 414

©2022 Ichor Systems

Risk Management of ESG Issues	Refers to the company's management and mitigation of environmental, social, and governance (ESG) risks, is integrated into the company's risk management system and considers the financial, physical, and market risks associated with climate change and social issues.	Business Integrity, Ethics and Compliance Cybersecurity and Data Protection Supply Chain Management Employee Wellness, Health, and Safety	GRI 102
Leadership Engagement and Accountability	Emphasizes the engagement and accountability of the company's leadership in environmental, social, and governance (ESG) issues. Includes the oversight, engagement, and knowledge of company leadership and members of the Board of Directors, emphasizing the integration of ESG issues into core business strategies and functions.	ESG Management and Reporting	N/A
Transparency and Reporting	Emphasizes transparency in the company's reporting on environmental, social, and governance topics. Includes disclosure of the company's management structure, goals, metrics, progress, and programs using clear, benchmarked, and easily accessible public channels.	ESG Management and Reporting	N/A
Emissions Reduction and Management	Refers to the management, reduction, measuring, and reporting of the company's Scope 1, 2, and 3 greenhouse gas emissions (GHGs)*. Emphasizes partnerships with suppliers and customers to make industry progress.	Energy Management and Emissions Reduction	GRI 305
Employee Health, Benefits, and Well-Being	Emphasizes programs for upgrading employee skills, developing careers, giving access to ongoing education and training, and providing fair wages and benefits. Includes equitable compensation, medical and disability coverage, flexible work and work life balance, and mental and physical health programs for full-time and temporary workers.	Employee Wellness, Health, and Safety	GRI 401
Employee Engagement and Development	Ensures the engagement and satisfaction of the company's employees, with an emphasis on strengthening employee retention, promotion, and development, and providing quality education and training to its workforce. Includes the recruitment and management of a skilled labor force and regular solicitation and consideration of employee feedback.	Learning, Development, and Culture	GRI 404

©2022 Ichor Systems

Diversity and Inclusion	Refers to the equitable treatment of employees and potential employees through company programs and policies ensuring non-discrimination and the hiring, promotion, retention, and inclusion of diverse individuals. Includes reporting and progressing on employee diversity metrics, empowering employee resource groups, and providing training on diversity and inclusion topics.	Diversity, Equity, and Inclusion	GRI 405
Occupational Health and Safety	Includes the company's compliance with local labor and workplace safety laws in the areas in which it operates. Encourages alignment with the guidelines from the International Labor Organization and includes ongoing safety training for employees, and the mitigation and reduction of worker injuries and incidents.	Employee Wellness, Health, and Safety	GRI 403

Index C: GRI Core Index

To the extent that information is available, we've developed this report in accordance with "GRI: Core" standards and the results of our 2021 materiality assessment.

Index D: SASB Material Metrics

Our material topics were identified through our 2021 materiality assessment. The topic boundary is contained within company operations. We are reporting our metrics in accordance with the SASB Semiconductor Industry Standards, which is the best fit to our key business operations. As this report is our inaugural ESG disclosure, we are reporting the data we have available at this time and intend to improve our data collection and reporting practices in future reports.

Table 1. Sustainability Disclosure Topics & Accounting Metrics

Code	Disclosure	Metric	Our Response
TC-SC-110a.1	(1) Gross global Scope 1 emissions and (2) amount of total emissions from perfluorinated compounds	Metric tons (t) CO_2-e	Please see our available greenhouse gas emissions data in "**Energy Management and Emissions Reduction**".
